

Transportation electrification and energy funding in the 2021 Infrastructure Investment and Jobs Act

By Bryan Jungers

July 11, 2022

The 2021 Infrastructure Investment and Jobs Act (IIJA) provides funding for states to develop a nationwide network of EV charging infrastructure. To help you understand how utilities can support their states in gaining funding—or find their own funding opportunities—we provide a section-by-section analysis of the legislation.

[Download the analysis \(PDF\)](#)

Read our publicly available report [How utilities can support EV charging infrastructure through the Infrastructure Investment and Jobs Act](#) for detailed advice on how your utility can access federal funding and work with government agencies to build a cross-country EV charging infrastructure.
